DETAILED ACTION

Response to Arguments

Applicant's arguments that the references do not disclose how the first operating point is determined beyond that it is a point where the motor exhibits acceptable torque ripple and linearity, filed 6/21/10, have been fully considered and are persuasive. Additionally, Examiner notes the predetermined voltage could be based on a minimum pulse width independent of the dead time. The rejections have been withdrawn.

Allowable Subject Matter

Claims 12-13, 15-18, 20-23, 25, 27-28 and 30 are allowed.

The following is an examiner's statement of reasons for allowance: With respect to Claim 12, the prior art does not disclose or suggest, in combination with the limitations of the base claim and any intervening claims, primarily, wherein said predetermined voltage is a minimum voltage that can secure the dead time of said voltage converter, and is determined based on the dead time, the power supply voltage and a control period length.

With respect to Claim 13, the prior art does not disclose or suggest, in combination with the limitations of the base claim and any intervening claims, primarily, wherein said predetermined voltage is a product of the power supply voltage and a control period length, divided by an effective control period length, the effective control period length being determined by subtracting the dead time from the control period length.

Claim 15 is allowed primarily for the same reasons as claim 13.

With respect to Claim 17, the prior art does not disclose or suggest, in combination with the limitations of the base claim and any intervening claims, primarily, wherein said maximum effective on-duty is determined by dividing an effective control period, calculated by subtracting said dead time from said control period, by said control period.

Claim 22 is allowed primarily for the same reasons as claim 17.

The aforementioned limitations in combination with all remaining limitations of the respective claims are believed to render the aforementioned indicated claim and any dependent claims thereof patentable over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
